

	Past	Present	Future
Mohammad	Last year, he planted 50 trees with his friends in their school's garden.	Currently, he participates in voluntary campaign to clean the streets of his city. He advises everyone to join them.	Next year, he will start using solar panels to produce electricity in his home to reduce the consumption of non-renewable energy.
Lubna	In her childhood/ youth, she used to recycle paper, glass, and plastic regularly.	Now, she uses public transportation instead of her car to reduce pollution. At the same time, she makes sure to turn off the lights when leaving her house.	In the future, she wants to invest in renewable energy to save electricity.
Youssef	Last Thursday, he participated in waste separation project at his school.	He usually uses recycled paper and avoids plastic shopping bags.	Next month, he will buy more eco-friendly products.
Aisha	For the last years, she started collecting rainwater to water the plants in her garden.	Now, she makes compost from food leftovers.	She will walk to work instead of using her car.
