

### Instructions

Each student needs a **plastic object** (or something they can easily flick) and a **coloured pen**.

1. Student A should place his / her plastic object at the bottom of the page.
2. Student A should flick it up the board using their finger.
3. If the plastic object lands on one of the images, then the student should speak about that image.
4. Student A should colour in that field (or write their name).
5. Now, it's student B's turn.

\* The game ends when all the shapes have been coloured in and the student with the most areas is the winner.
